Project

Movie Recommendation System • Movie Tox

- Developed a web-based Movie Recommendation System that suggests movies based on user preferences.
- Integrated a comprehensive movie database to provide detailed information about films.
- Implemented a recommendation algorithm to personalize movie suggestions for users.
- Designed an intuitive user interface for easy navigation and enhanced user experience.
- Planned to add a discussion room where users can share new movie plot ideas.
- Aimed to inspire filmmakers by providing a platform for fresh story concepts.
- Tech Stack Used: Python, Django, MySQL
